## 📁 WORK EXPERIENCE

2021 – present	<b>Contractor/Freelancer</b> BACKEND, FULLSTACK · Remote 📍  Spearheaded the transformation of legacy APIs from a distributed monolith to microservices, ensuring seamless integration with new APIs while maintaining high availability and consistency.  Implemented new features for existing APIs, provided support to the frontend teams, and adapted quickly to evolving requirements, ensuring ongoing reliability of backend services. (Java, Spring, Hibernate, Go, AWS, PostgreSQL)  Developed from scratch a platform facilitating communication between institutions and clients, enabling users to initiate contact, provide feedback, and track updates. (React Native, Typescript, Go, Gin, GCP, Firebase, PostgreSQL)  Optimized and developed functionalities for Identity services within the Adobe platform, enhancing client authorization and authentication. (Java, Spring, Kotlin, React)  Managed and optimized microservices for document storage and notifications, maintaining consistent performance despite substantial data volume and daily requests. (Java, Spring, Cassandra)
2019 – 2021	<b>Cognizant Softvision</b> BACKEND · Bucharest/Remote 📍  Developed a REST API that provides useful information related to the investment in cocoa industry.  Java, Spring, Hibernate, PostgreSQL, Drone, Microsoft Azure, Junit, Mockito
2018 – 2019	<b>Luxoft</b> BACKEND · Bucharest, RO 📍  Developed & offered support for a test library for the client's main financial product.  Java, Maven, Perforce, Lombok, Jenkins, Jira, JAXB, Jackson, JUnit, Mockito
2015 – 2018	<b>Unicredit</b> BACKEND · Iasi, RO 📍  Developed & offered support for the main risk management app of UniCredit.  Java, Maven, Subversion, Oracle DB, JasperReports

## 📁 PERSONAL PROJECTS

2023	<b>Archive Utility</b>  A utility tool for a small family business to streamline archive document organization, facilitating their transition from conventional Excel-style databases to a more modern and contemporary interface.  The tool not only provides a superior UI/UX compared to Excel spreadsheets but also includes additional functionalities such as: generate labels, inventories, selection report etc.

## 📖 ABOUT ME

Backend Engineer with over 8 years of experience in developing desktop/web/mobile applications, with a keen and active interest in full-stack development in the last 2 years, currently activating as a contractor/freelancer.

## ⚙️ PROGRAMMING

I've worked with various product teams, with sizes reaching from a sole developer to having more than 10-15 colleagues.

I have experience in developing desktop, web and mobile applications; I've previously worked with monoliths, as well as with APIs and microservices.

I'm able to provide my expertise in backend/frontend or even DevOps if it's required.

I'm able to work in the following environments/use the following languages and tools at the moment:

Java - 8+ yoe SQL - 5+ yoe Javascript/Typescript - 2 yoe Golang - 1 yoe  GCP - 1 yoe AWS - 1 yoe	Spring - 5+ yoe Hibernate - 5+ yoe PostgreSQL - 5+ yoe React - 2+ yoe React Native - 1 yoe Next.js - 1 yoe Kubernetes - 1 yoe Apache Kafka - 1 yoe Docker - 2+ yoe Git - 6+ yoe
